

RGL20

SINGLE LEG KINETIC® WEBBING LANYARD RGL20

The RGL20 is a fall arrest lanyard without the bulky shock pack, which incorporates inner webbing that (in the event of a fall) will stretch under a constant controlled force to reduce the impact on the wearer.

A more comfortable wearing experience due to there being no shock pack, so the user won't experience the harness attachment point being pulled down. A main benefit is a shorter fall distance when compared to a lanyard with a shock pack. A rip stitch indicator will deploy in the event of a fall.

This lanyard should be used when an operative is working from a static position connected to a fixed anchor point.

EN 355:2002

Material:	32mm inner shock absorber webbing polyester 36mm outer water repellent tubular polyester 29kN
Fittings:	Any compatible EN 362 connectors
Max arrest force:	<6kN
Length (s)	1.4m 1.8m (including connectors)

FEATURES

Kinetic® webbing
