

ROCKALL
SAFETY

Full Accessory Brochure

WHY CHOOSE ROCKALL SAFETY?

Since 1995, Rockall Safety has been one of the UK's top suppliers of professional safety equipment to thousands of clients from a wide range of industries in the private and public sectors, including food & beverage, water & wastewater, petrochemicals, construction, as well as oil & gas.

We specialise in gas detection, monitoring, and measuring and offer a comprehensive product range which includes fixed and portable gas detectors, respiratory protection, and diagnostics equipment.

Our dedicated technical sales specialists are fully trained and certified to advise individual clients on the services and products they need to achieve the highest standards of safety.

With an established team of in-house engineers, trained and certified directly by manufacturers, our product range is calibrated, and tested to the highest standards prior to dispatch, which ensures that what you receive from us is immediately fit for field use upon arrival.

Rockall is an award-winning company which has successfully partnered with the world's leading gas safety manufacturers such as Honeywell, Dräger, and Crowcon to provide a wide range of products that cover various applications. We are even proud to be an Approved Service Point (ASP) for Dräger Master Service Centre and BW by Honeywell.

Our main principles

We pride ourselves on providing excellent customer service, reliable gear, and technical support to our customers. Operating nationwide, our success as a business is based on our customer-oriented approach. We offer a prompt and efficient service, best prices, and most importantly the right safety solutions to meet your individual requirements.

Our Services

Choosing Rockall ensures that you receive only the most reliable equipment available on the market, calibrated and tested by our certified engineers.

We also offer after-sales repair and maintenance checks on your safety devices, ensuring that these are up-to-date and function properly.

Portable Gas

Portable gas detectors are compact devices used to detect hazardous gases in various environments. They ensure safety by providing real-time monitoring, alarming users of dangerous gas levels, and are essential for industrial, environmental, and emergency response applications.

Fixed Gas

Fixed gas detectors are permanently installed devices used to continuously monitor and detect hazardous gases in specific areas. They enhance safety by providing constant surveillance, triggering alarms, and integrating with safety systems in industrial, commercial, and residential settings.

Escape & Rescue

Escape and rescue involve strategies and procedures to safely evacuate individuals from hazardous situations and provide aid. These critical operations require proper planning, training, and equipment to ensure timely, efficient, and safe removal of individuals from danger zones.

Confined Space

Confined spaces are areas with limited entry and exit points not designed for continuous occupancy. These spaces, like tanks, tunnels, and manholes, pose significant hazards, including poor ventilation, making safety measures essential for workers entering such environments.

Servicing & Hire

Rockall Safety ensures your gas detector is serviced to the highest standards. Our expert team provides thorough maintenance, calibration, and repair, guaranteeing reliable performance and compliance with safety regulations, keeping your equipment ready for any hazardous environment.

Fall Arrest

Fall arrest systems are safety mechanisms designed to prevent or stop falls from heights. They include harnesses, lanyards, and anchor points, ensuring worker safety in construction, maintenance, and other high-risk industries by minimizing injury risks associated with falls.

GAS DETECTION ACCESSORIES

From calibration gases and bump test kits to protective enclosures and sampling systems, gas detection accessories not only improve the functionality of detection devices but also provide critical support for the safety of personnel in various industries, including oil and gas, construction, and manufacturing.

Used across a wide range of industries, these detectors are critical to the well-being of personnel operating in hazardous areas. There are many different types of Portable detectors available, each with its specific features and benefits.

When choosing a monitor, it is important to consider the specific hazards that workers will be exposed to. It is also important to consider the size and weight of the detector, as well as the battery life.

Benefits:

They can help to prevent accidents and injuries by detecting hazardous gases before they reach harmful levels.

Gas detectors can also help to improve productivity by reducing the number of lost workdays due to illness or injury.

Portable gas detectors are a valuable safety tool that can help protect workers from the hazards of hazardous gases.

COMPANIES WE WORK WITH

Honeywell

Rockall Safety offers a range of Honeywell gas detection accessories to enhance the functionality and safety of gas monitoring systems.

CROWCON

Detecting Gas **Saving Lives**

Rockall Safety provides a selection of Crowcon gas detection accessories designed to optimise gas detection system performance and safety.

Dräger

Rockall Safety supplies Dräger gas detection accessories, offering reliable solutions to improve the effectiveness of gas detection

blackline**safety**

Rockall Safety offers a range of Blackline Safety gas detection accessories to enhance the performance and reliability of gas monitoring systems.

Honeywell offers a range of professional-grade portable gas detectors for industrial, marine, and confined space environments.

BW GasAlertQuattro Auxiliary Filter Kit (5)

Built to provide extra protection in harsh conditions, the BW GasAlertQuattro Auxiliary Filter Kit ensures safety during field work.

This kit allows the user to fit an adaptor to their gas detector that holds an additional filter, adding more protection to the sensors during work in extreme conditions.

[Buy](#) [Hire](#)

BW GasAlert Quattro Carrying Holster

Providing security to your BW gas monitor during use, this BW GasAlert Quattro Carrying Holster is designed to streamline your working day.

With a lightweight design, this holster provides an easy way to transport your device when carrying out your daily work work.

[Buy](#) [Hire](#) [Service](#)

BW GasAlertQuattro Vehicle Attachment

Enabling easy use of your device while on the go, this BW GasAlertQuattro Vehicle Attachment is a useful addition to your safety gear.

This 12-24 VDC vehicle power adaptor is for use with the GasAlert Quattro range.

[Buy](#) [Hire](#) [Service](#)

BW GasAlert Quattro Concussion-Proof Boot

Providing extra protection in case of extreme conditions, this BW GasAlert Quattro Concussion-Proof Boot fits snugly around your gas detector.

Formed from strong rubber, this BW accessory ensures that your device is protected from any accidental bumps or scratches.

[Buy](#) [Hire](#) [Service](#)

Quattro Rechargeable Black Battery Pack

Designed to provide power when you're on the go, this BW GasAlert Quattro Rechargeable Black Battery Pack is a useful addition to your daily safety gear.

This BW branded device ensures that your equipment is ready when you are – allowing you to remotely recharge your devices whenever,

[Buy](#) [Hire](#) [Service](#)

Quattro Deluxe Confined Space Kit

Designed to provide all of the necessary accessories for safe working, this BW GasAlert Quattro Deluxe Confined Space Kit is the perfect complement for your gas detector.

This kit includes everything you need to use your Quattro gas monitor.

[Buy](#) [Hire](#) [Service](#)

Quattro Multi-Unit Cradle Charger

A compatible accessory for the GasAlert Quattro range, this Multi-Unit Cradle Charger can charge up to 5 devices at any one time.

Designed to ensure that your devices are charged and ready to go when you need them, this useful charger is a smart addition to your gas detection gear.

[Buy](#) [Hire](#) [Service](#)

Quattro Quad Sensor Screens

A compatible addition to your gas monitor, these BW GasAlert Quattro Quad Sensor Screens can prolong the life of your device.

Available as a pack of 2, these replacement parts allow the user to continue using their device. long after the life of the original sensor screens end.

[Buy](#) [Hire](#) [Service](#)

BW 12V Power Adaptor (GasAlert Series)

Designed to provide power on the go, this BW 12V Power Adaptor ensures that your BW GasAlert device is ready to go when you need it most.

This easily-operated device simply attaches to the cigarette plug in any vehicle to easily charge the device attached.

- Buy
- Hire
- Service

BW GasAlert Chest Harness

Compatible with the entire BW GasAlert series, this branded GasAlert chest harness provides the user with easy access to their gas monitor without affecting mobility.

This device offers an ideal solution for hands-free detecting, using the holder to securely support the gas detector to your chest.

- Service

BW Replacement Power Supply

Designed to prolong the life of your device, this BW Replacement Power Supply for Chargers ensures that your charger always has power when you need it.

This branded replacement part is to be used when your existing power supply comes to the end of its life. It is compatible with the BW GasAlert.

- Buy
- Hire
- Service

BW Replacement Power Adaptor

A useful addition to your BW gas monitor, this BW Replacement Power Adaptor enables you to keep your device fully operational and ready to go.

This wall outlet cable enables the user to recharge their device, ensuring it is fully operational and ready to go when you are.

- Buy
- Hire
- Service

BW GasAlertMax XT Replacement Back Case

This BW GasAlertMax XT Replacement Back Case protects your gas monitor from dust and dirt, prolonging the life of your device.

This replacement part is easily fitted into your device, allowing your BW branded gas monitor to be used long after the original front casing is no longer usable.

- Buy
- Hire
- Service

BW GasAlertMax XT Replacement Back Case

This BW GasAlertMax XT Replacement Back Case protects your gas monitor from dust and dirt, prolonging the life of your device.

This replacement part is easily fitted into your device, allowing your BW branded gas monitor to be used long after the original front casing is no longer usable.

- Buy
- Hire
- Service

BW IR Connectivity Kit w/ Fleet Manager II

The BW Connectivity Kit is designed to easily download data from a BW gas detector, as well as allowing the user to configure the set-up options.

With its IR link, the user can calibrate sensors, change alarm parameters and set span gas concentration values.

- Buy
- Hire
- Service

GasAlertMax XT II Deluxe Confined Space Kit

This GasAlertMax XT II Confined Space Kit is designed to provide all of the accessories needed.

This branded BW kit includes IR connectivity kit, 0.5 LPM regulator, 3 m (10 ft.) hose, 1 m (3 ft.) hose, sampling probe, concussion-proof boot, auxiliary filter and Fleet Manager II software CD.

[Buy](#) [Service](#)

GasAlertMax XT II Replacement Front Case

Designed to prolong the life of your gas monitor, this BW GasAlertMax XT Replacement Front Case ensures your device is protected from dust and dirt.

This replacement part is easily fitted into your device.

[Buy](#) [Service](#)

GasAlertMax XT II Replacement Front Case

Designed to prolong the life of your gas monitor, this BW GasAlertMax XT Replacement Front Case ensures your device is protected from dust and dirt.

This replacement part is easily fitted into your device.

[Buy](#) [Service](#)

BW Max XT II Concussion-proof Boot

Designed to provide additional safety to your gas monitor, this BW Max XT II Concussion-proof Boot fits snugly around your device.

Formed from strong rubber, this BW accessory ensures that your device is protected from any accidental bumps or scratches.

[Buy](#) [Service](#)

BW Max XT II Confined Space Kit

Contained within a robust hard shell case, this GasAlertMax XT II Confined Space Kit provides all the accessories needed for the safe use of the GasAlertMax XT II gas detector.

Please note that the GasAlertMax XT II gas detector and any calibration gas are sold separately.

[Buy](#) [Service](#)

BW MicroClip XL Bank Charger

The multi-unit cradle charger from BW Technologies will allow up to five GasAlertMicroClip XL multi gas detectors to be charged, simultaneously. Once the detectors are in the charger, the battery icon on the LCD will show as fully charged when they are ready for use.

[Buy](#) [Service](#)

BW MicroClip XL Front Case

The MicroClip XL front moulding replacement accessory is an essential component designed to restore the exterior of your BW MicroClip XL gas detector. Over time, the front moulding can experience wear and tear due to harsh working environments, leading to potential damage that compromises the device's durability.

[Buy](#) [Service](#)

BW MicroClip XT Leather Case

Designed to keep your device safe, this BW GasAlert MicroClip XT Leather Case is a smart accessory for your safety equipment.

The case is made from strong leather and features a robust PVC screen cover.

[Buy](#) [Service](#)

BW GasAlert Multi-Unit Power Adaptor

Designed to provide power to multiple BW gas detectors at once, this BW GasAlert Multi-Unit Power Adaptor is a useful safety accessory.

This device can be used to recharge up to five gas monitors at one time, which reduces down time in between uses and ensures that your devices are ready to go when you are.

[Buy](#) [Service](#)

BW GasAlertMax XT Replacement Pump Kit

Designed to prolong the life of your gas detector, this BW GasAlertMax XT Replacement Pump Kit can ensure that your device is working efficiently.

This BW branded replacement part is easily fitted to your device when the original pump is no longer usable.

[Buy](#) [Service](#)

Manual Aspirator Pump Kit with Probe (1 ft.)

A compatible accessory for your GasAlert Quattro gas monitor, this BW Manual Aspirator Pump Kit with Probe is designed to lengthen your sampling range.

This branded BW kit features a generous 1 foot (0.3m) probe, allowing the user to extend their sampling range.

[Buy](#) [Service](#)

BW Max XT II Charger with Multi-Unit Design

The BW Max XT II Charger cradle has the ability to charge up to five GasAlertMax XT II multi gas detectors, simultaneously. Recharge time for the GasAlertMax XT II is normally 6 hours and this gives the detector between 8 and 13 hours battery life (depending on the temperature).

[Buy](#) [Service](#)

“With Honeywell’s industrial gas detectors, you never have to trade off on the flexibility or reliability of your control system, making the best decisions at a glance”

BW Micro 5 Rechargeable Battery

Ensure your gas detector is fully operational when you need it the most with this BW Micro 5 Rechargeable Battery Pack.

This BW branded pack includes a lithium polymer battery that is rechargeable, and enables the user to keep their device safely charged.

[Buy](#) [Service](#)

GasAlertMicroClip XL Replacement Back

Designed to prolong the life of your device, this BW GasAlertMicroClip XL Replacement Back Enclosure ensures that your gas monitor is protected on the field.

This branded spare part protects your BW gas detector from dust and dirt.

[Buy](#) [Service](#)

BW Series Replacement Test Cap and Hose 1ft

Designed for use with the BW gas detector family, this replacement test cap and hose offer an ideal solution when you're low on supplies to accompany your gear.

This replacement set allows the easy delivery of gas to the sensor port for remote sampling.

[Buy](#) [Service](#)

BW Gas Detector Short Strap (15.2cm)

This BW branded short strap ensures the security of your portable gas detector when carrying out operations on the field.

The adjustable design has a maximum length of 15.2cm. It adds protection to your operation by fastening your device to your wrist, ensuring it isn't dropped.

[Buy](#) [Service](#)

BW Solo IntelliDox Nest

The BW Solo IntelliDox Nest is a docking station designed specifically for the BW Solo single gas detector. It allows quick and easy calibration, bump testing, and configuration of the Solo gas monitor.

The Nest is designed for use with the BW Solo IntelliDox Docking Station.

[Buy](#) [Service](#)

BW Solo Replacement Test/Calibration Cap

The BW Solo Replacement Test/Calibration Cap is a crucial accessory for maintaining the accuracy and reliability of your BW Solo single gas detector. Regular calibration is essential to ensure that the detector is functioning correctly and providing accurate readings, which is critical in potentially hazardous environments.

[Buy](#) [Service](#)

BW Ultra Carrying Case w/ Foam & Lid Insert

An ideal solution for safely transporting your gas detector, this BW Ultra Carrying Case is designed to house your device as well as any accessories.

This carry case is built with a hard shell outer that can protect your monitor from any accidental bumps or scrapes during transportation.

[Buy](#) [Service](#)

BW Concussion-Proof Boot, Pump Units

Providing further protection to your gas monitor, this BW Concussion-Proof Boot is designed to fit snugly around the GasAlertMicro 5 Pumped monitor.

This accessory is formed from strong rubber that protects your device from any accidental bumps or scratches during day to day use.

[Buy](#) [Service](#)

BW Micro 5 Charger & Rechargeable Battery

Designed for use with your BW gas monitor, this Micro 5 Cradle Charger helps to ensure that your device is operational when you need it most.

This set includes a handy battery pack that provides you with power while on the go, adding reliable protection to your field work operations.

[Buy](#) [Service](#)

BW Flow Regulator for Disposable Gas

Designed for use with the GasAlert range of detectors, this BW Flow Regulator is made to provide the exact right amount of gas that is required.

This device makes calibration quick and easy, by regulating the flow of gas between the cylinder and instrument pump.

[Buy](#) [Service](#)

BW Non-Conductive Hard Hat Clip

Designed to enable the convenience of working with a gas detector, this BW Non-Conductive Hard Hat Clip enabled the detector be easily attached to any helmet.

This device seamlessly attaches the appropriate gas monitor to the hard hat, ensuring the user has easy access to the monitor.

[Buy](#) [Service](#)

IntelliDox Docking Station for BW Clip

IntelliDox is an instrument management system for the BW Clip, bringing a new level of customization to maintenance-free gas detection.

Combining smart docking modules and Fleet Manager II software, the system helps you drive productivity, reliability and efficiency.

[Buy](#) [Service](#)

BW Micro 5 Motorised Pump (Gen 2)

This Integral Micro 5 Motorised Pump (Generation 2) kit contains all the necessary equipment to use your gas detector safely and effectively.

The set includes a motorised pump cover, 1 ft./30 cm sample probe with hydrophobic barrier (water trap).

[Buy](#) [Service](#)

BW Micro 5 Gas Detector Carrying Case

An ideal solution for transporting your personal gear, this gas detector carrying case is designed to safely house your BW Mirco 5 and any accessories.

The robust design has a soft inner foam padding that will keep your gas monitor safe and secure when on the go.

[Buy](#) [Service](#)

BW GasAlert MicroClip XT/XL/X3 Adaptor

Built to provide extra protection to your device, the BW GasAlert MicroClip XT Filter Adaptor ensures safety during field work.

This kit allows the user to fit filters to their gas monitor, adding more protection to the sensors during work in extreme conditions.

[Buy](#) [Service](#)

BW MicroClip XT/XL/X3 Auxiliary Filter

Working as a replacement part for your filter adaptor, the BW GasAlert MicroClip XT Auxiliary Filter Replacement adds further protection to your gas monitor.

This kit is made up of filter replacements for your filter adaptor, ensuring that your device is always protected.

[Buy](#) [Service](#)

“Get the specific gas detection product you need and benefit from quality, functionality and ease of use. Wherever hostile environments exist, Honeywell will make it a safer workplace for everyone.”

MicroClip XT/XL/X3 Replacement LCD

Working as a replacement part for your gas detector, this BW GasAlert MicroClip X3 Replacement LCD is designed to prolong the life of your device.

This replacement part is easily fitted into your device, allowing your BW branded gas monitor to be used long after the original screen stops.

[Buy](#) [Service](#)

BW Micro 5 Gas Detector Carrying Case

An ideal solution for transporting your personal gear, this gas detector carrying case is designed to safely house your BW Mirco 5 and any accessories.

The robust design has a soft inner foam padding that will keep your gas monitor safe and secure when on the go.

[Buy](#) [Service](#)

MicroClip XL/ X3 Quad Sensor Screen Filters

Built for use with the BW GasAlert MicroClip XL / X3 gas monitors, these replacement Quad Screen Filters ensure the longevity of your device.

Available in a pack of ten, these replacement filters enable the user to continue using their BW gas detector for as long as possible.

[Buy](#) [Service](#)

Steel Alligator Style Replacement Clip

A branded accessory from the BW gas detection series, this alligator-style replacement clip securely attaches the portable device to the wearer.

Compatible with many items across the BW range, this durable clip is made from robust stainless steel.

[Buy](#) [Service](#)

Able to accommodate various gas settings, including CO, H2S, O2, and SO2, this generous range of gas monitors provides you with a seamless user experience that will streamline your workday.

T4 10 way charger

T4 10-Way Charger is an efficient charging solution designed to charge and store up to 10 Crowcon T4 Multi-Gas Detectors simultaneously.

Ideal for large teams or industrial sites, this charger streamlines the process of keeping multiple units fully powered

[Buy](#)

IRmax Mounting Bracket Kit

IRmax Mounting Bracket Kit is an essential accessory for securely installing the IRmax infrared gas detector to a wall or a 2" (50mm) pipe. The kit includes a mounting bracket, along with the necessary straps, nuts, and bolts for pipe mounting, ensuring that the detector is properly fixed in place for reliable gas detection.

[Buy](#) [Hire](#) [Service](#)

T4 Bump/Calibration plate

T4 Bump/Calibration Plate is an essential accessory designed for use with the Crowcon T4 Multi-Gas Detector, specifically for applying test gas during bump tests or calibration. Regular bump testing and calibration are critical for ensuring that gas detectors, like the T4, function accurately and reliably in hazardous environments.

[Buy](#) [Hire](#) [Service](#)

Xgard Bright Calibration Adaptor

Xgard Bright Calibration Adaptor is a critical accessory designed to facilitate the accurate calibration of the Xgard Bright gas detector. Calibration is essential for ensuring that gas detectors provide reliable and precise readings over time, especially in environments where hazardous gases pose significant safety risks.

[Buy](#) [Hire](#) [Service](#)

Drager X-am® 5000 Multi-Gas Detector

The X-am® 5000 can measure up to five different gases simultaneously using its state-of-the-art XXS sensors.

The X-am 5000 is the ideal personal gas monitoring solution and can be used across a wide range of industrial environments, including explosive areas.

[Buy](#) [Hire](#) [Service](#)

T4 Cradle charger

T4 Cradle Charger is a convenient and efficient docking station designed for the seamless charging of your gas detection devices. With its user-friendly design, the cradle allows you to simply dock the detector for quick and easy recharging, ensuring your equipment is always ready for use in critical situations.

[Buy](#) [Hire](#) [Service](#)

Crowcon Chest Strap Kit

Consisting of two straps, this Crowcon chest strap kit is built to accompany the harness plate (sold separately). This results in a seamless hands free experience, when applied to your Gasman or T3 gas detectors.

[Buy](#) [Hire](#) [Service](#)

Gas Detector Chest Harness Kit

An all in one inclusive accessory, this Crowcon gas detector chest harness kit offers hands-free access to your portable gas monitor (Gasman & T3) while on the job.

This is an ideal solution for a wide range of applications where the user requires easy use of their gas monitor kit.

[Buy](#) [Hire](#) [Service](#)

Clip SGD Docking Station

The Clip SGD Docking Station is a reliable solution for managing and maintaining portable gas monitors. As bump testing becomes increasingly common across various industries, ensuring the accuracy of gas detection sensors is critical.

[Buy](#) [Service](#)

XgardIQ Collector Cone

XgardIQ Collector Cone is a valuable accessory designed to enhance the detection capabilities of the XgardIQ gas detector, specifically for gases that are lighter than air, such as hydrogen and methane.

[Buy](#) [Service](#)

Gasmaster PC Communications Kit

Gasmaster PC Communications Kit is an essential accessory for those using Gasmaster control panels. This kit includes all the necessary components to facilitate easy event-log uploads and ensure seamless communication between your Gasmaster system and a PC.

[Buy](#) [Service](#)

RS-485 to 232 converter kit

Vortex RS-485 to 232 Converter Kit is an essential tool for expanding the monitoring capabilities of your gas detection system. Designed specifically for the Vortex control panel, this kit allows for seamless communication between the Vortex system and a PC via an RS-485 connection.

[Buy](#) [Service](#)

Vortex Accessory Enclosure

Vortex Accessory Enclosure is a critical component designed to support the connection of mV bridge flammable gas detectors, including the Xgard Type 3 and Type 4. This enclosure is ideal for environments where gas detectors need to be installed in hard-to-reach or inaccessible locations.

[Buy](#) [Service](#)

Alligator Clip for Gas Detector

A branded accessory for the gas detection ranges, this Crowcon Alligator Clip securely attaches the portable device to the wearer.

Compatible with many items across the Crowcon range, this durable clip is made from robust stainless steel that can withstand harsh environments.

[Buy](#) [Service](#)

Crowcon Gas Detector Shoulder Strap

Built for use in conjunction with the harness plate, this gas detector shoulder strap provides the user with hands-free access to their equipment; a convenience accessory to accompany your Gasman and T3 gas monitors during daily operations.

[Buy](#) [Service](#)

Gasman Aspirator Assembly by Crowcon

A worthy accessory for the Crowcon gas detector series, this Gasman aspirator assembly offers an ideal investment when gas sampling. Included in the box is a bulb, cap and a hose (2 yards in length).

[Buy](#) [Service](#)

“From single gas detectors to bespoke, engineered fixed systems, our team of specialists can ensure you have the right solution to suit your requirements.”

Gasman External Filter by Crowcon

Built for use in harsh environments with high levels of dust, this Crowcon Gasman external filter will ensure the longevity of your portable gas detector. This offers an ideal solution for users who work in work sites.

Crowcon Single Way Gasman Charger

Designed for use with the Crowcon Gasman range, this easy-to-use compatible Gasman charger enables the user to top up the power supply when you need it most.

This multi-region charger allows you to quickly and easily bring power back to your device.

Crowcon Gasman Charger Kit

Part of the Crowcon gas accessory family, this Gasman charger kit offers a comprehensive solution that will keep your portable monitor charged when you need it most.

This charger is compatible with rechargeable Crowcon Gasman Single Gas Detectors.

Crowcon Hard Hat Clip

Designed with user convenience in mind, this branded Crowcon hard hat clip attaches your portable gas detector to your helmet; this results in a hands free experience that provides easy use throughout your day to day operations.

[Buy](#) [Service](#)

[Buy](#) [Service](#)

[Buy](#) [Service](#)

[Buy](#) [Service](#)

Crowcon Leather Gas Detector Carry Case

Built for easy transport of your equipment, this gas detector carry case is compatible with the Crowcon Gasman series. This accessory can clip to the user's belt, providing convenient hands-free access while on the job.

Multiway Charger (5-way)

Designed to recharge up to 5 Gasman Gas Detectors simultaneously, this Crowcon multiway charger has you covered, assisting you in keeping your devices powered up before an operation.

Note that the power is sold separately.

Crowcon Single Way Charger / Interface

Compatible with the Gasman series, this Crowcon single-way charger provides a convenient way for you to seamlessly power up your Gasman monitor before an operation, which includes the compatible plug.

External filter plate

External Filter Plate is a valuable accessory designed to provide additional protection for gas detectors in challenging environments. Specifically engineered as a clip-on filter, it offers an extra layer of defence against dust and debris, helping to safeguard the detector's sensors from contamination.

[Buy](#) [Service](#)

[Buy](#) [Service](#)

[Buy](#) [Service](#)

[Buy](#) [Service](#)

XgardIQ Flow Adaptor

XgardIQ Flow Adaptor is a specialised accessory designed for gas sampling applications, providing a reliable method to introduce gas samples directly to the XgardIQ sensor. In industries where precise gas detection is critical, such as chemical plants, oil and gas facilities, and confined spaces.

Buy

Xgard Bright Flow Adaptor

Xgard Flow Adaptor is a specialised accessory designed for use in gas sampling applications with the Xgard gas detector. This adaptor allows gas samples to be drawn from a specific location and delivered to the sensor, making it ideal for confined spaces, remote areas, or environments where direct exposure to gases may be difficult to monitor.

Buy Hire Service

Gas Detector Socket Lead by Crowcon

A ideal solution to accompany your gear, this gas detector socket lead will ensure that your monitor is ready for use when you're out in the field. Compatible with the rechargeable Gasman range, this accessory provides added convenience to the user, which will improve efficiency during operations.

Buy Hire Service

Crowcon Harness Plate

This branded Crowcon Harness Plate offers seamless hands-free operation for the popular Gasman and T3 gas detector models. This is the perfect accessory for a wide range of applications where the user requires easy and immediate access.

Buy Hire Service

Gasman Flow Cap Assembly

Part of the Crowcon family, this flow cap assembly piece seamlessly accommodates calibration and gas sampling for the Gasman range of detectors.

The popular Gasman gas detector enables the user to carry out confined space work in complete safety.

Buy Hire Service

Gasmaster Communications Port

Gasmaster Communications Port is an essential upgrade for Gasmaster gas detection systems that were initially ordered without this feature. Designed to enhance the system's communication capabilities, the port allows seamless integration with external control systems, providing real-time data transfer and monitoring.

Buy Hire Service

Crowcon GasPro Charger Cradle

A necessary accessory for your gas detector, this Crowcon GasPro Charger Cradle offers a comprehensive charging solution.

This device allows you to safely charge your GasPro monitor ready for when you need it most.

Buy Hire Service

Gas-Pro Hard shell case

Includes custom foam insert with space for standard items – contents not included.

Buy Service

Gas-Pro CSE Kit Case

Gas-Pro CSE Kit Case is an ideal storage solution for professionals who require safe and secure transportation of their gas detection equipment. It is designed with a custom foam insert that ensures all components are kept organized and protected during transit. The foam insert includes designated spaces for essential equipment.

[Buy](#) [Service](#)

Hand aspirator bulb

and aspirator bulb is a key tool for manual gas sampling, providing a convenient solution when electronic pumps are unavailable or impractical. This handheld device allows users to draw gas samples manually from remote or confined areas, ensuring the safe analysis of potentially hazardous atmospheres before entry.

[Buy](#) [Service](#)

Clip SGD IR Link

Clip SGD IR Link is a versatile tool designed to enhance the functionality of your gas detection devices. With the IR Link, users can easily change settings, upgrade firmware, download event logs, and perform calibrations. This capability ensures that your gas detectors remain up-to-date and fully functional.

[Buy](#) [Service](#)

IRmax Remote Calibration Box

IRmax Remote Calibration Box is a specialised accessory designed for use in offshore environments, where harsh conditions demand durable and reliable equipment. This calibration box enables the remote calibration of the IRmax infrared gas detector.

[Buy](#) [Service](#)

XgardIQ Pipe Mounting Kit

The Pipe Mounting Kit is an essential accessory for securely installing the XgardIQ gas detection transmitter to a variety of pipe sizes. Constructed from durable stainless steel, the kit includes robust U-bolts, nuts, and washers designed to provide a rigid and reliable mounting solution.

[Buy](#) [Service](#)

Gas-Pro Pumped flow plate

Gas-Pro Pumped Flow Plate is an essential replacement component designed for pumped Gas-Pro units, ensuring optimal performance of your gas detection system. This flow plate plays a key role in directing gas samples into the detector through the pump.

[Buy](#) [Service](#)

Sampling tube

The compatible sampling tube for the Gas-Pro is an essential accessory for professionals using the Gas-Pro Confined Space Gas Detector in environments where remote sampling is required. This sampling tube allows for accurate gas detection from a distance.

[Buy](#) [Service](#)

Shoulder Single strap

Single straps which in combination with the chest harness plate enable the detector to be worn over the shoulder.

[Buy](#) [Service](#)

IRmax Spigot Gland (M20)

IRmax Spigot Gland (M20) is a key accessory designed to connect the IRmax infrared gas detector to an auxiliary junction box, facilitating a secure and reliable electrical connection. This spigot gland is essential for installations where the detector needs to be integrated into a broader gas detection system.

[Buy](#) [Service](#)

XgardIQ Splash Guard

The XgardIQ Splash Guard is an essential accessory for protecting gas detection sensors in outdoor environments. Designed specifically for the XgardIQ transmitter, the splash guard shields the sensor from water sprays.

[Buy](#) [Service](#)

Xgard Bright Spray Deflector

Xgard Bright Spray Deflector (C01052) is an essential accessory designed to protect gas detectors from water sprays in outdoor environments. In industrial and commercial settings where water exposure is frequent—such as near cooling systems, sprinkler installations, or in rainy conditions.

[Buy](#) [Service](#)

GasPro Chest Harness Straps

Crowcon GasPro Chest Harness Straps are designed to enhance both safety and practicality for professionals working in hazardous environments, especially confined spaces. The two adjustable straps work seamlessly with the GasPro Chest Harness Plate, securing the gas detector snugly against the chest.

[Buy](#) [Service](#)

XgardIQ Sun Shade

XgardIQ Sun Shade is a practical accessory designed to protect the XgardIQ gas detector from elevated temperatures caused by direct sunlight. Excessive heat can compromise the accuracy and reliability of gas detection systems, making temperature management a critical factor in ensuring optimal performance.

[Buy](#) [Service](#)

Tube insert pack – box of 10

Tube insert pack – box of 10 is a must-have accessory for anyone using the Gas-Pro Confined Space Gas Detector with remote sampling capabilities. Each box contains 10 replacement inserts, designed specifically to allow a secure connection between the sampling tube and the Gas-Pro flow plate.

[Buy](#) [Service](#)

Gas-Pro un-pumped flow plate

Gas-Pro un-pumped flow plate is a replacement part specifically designed for un-pumped Gas-Pro units, ensuring the continued accuracy and efficiency of your gas detection system. As a crucial component in the Gas-Pro's sampling process, the flow plate allows gas samples to pass into the detector for analysis.

At Rockall, we stock a comprehensive range of products from portable and fixed gas detection to chemical suits, bump test gas, industrial escape sets, gas detection tubes and many more. We have proudly worked alongside Dräger for many years and have come to know the high standards of quality and reliability of their products as a benchmark.

Dräger X-am Charger & Power Supply

This power supply is designed to recharge your Dräger X-am gas monitor, ensuring that your device is ready to go when you are.

Its easily-operated design charges one device at a time via use of a mains outlet. It includes an LED status indicator to alert the user to the status of the battery.

Dräger Bump Test Station (PAC Series)

This easy-to-use Dräger Bump Test Station is designed to provide quick and reliable bump testing for a range of Dräger gas monitors. Its mobile design doesn't require electrical power, and therefore can be used where needed. Simply connect the correct gas monitor and gas cylinder to the station and it will begin testing automatically.

Blackline Safety gas detectors are designed to provide workers with a wealth of live data and real-time alerts of hazardous gas exposure. The detectors are connected to a cloud-based platform that allows supervisors to monitor the safety status of their workers in real-time – This information can then be used to quickly identify and respond to potential hazards.

Blackline Safety G6 Dock

Blackline Safety G6 Dock is a simple and efficient solution for calibrating, bump testing, and charging your G6 wearable single-gas detector. Designed for convenience and ease of use, the dock ensures your gas detection device is always ready for use in potentially hazardous environments.

[Buy](#) [Service](#)

Blackline Safety G7 Bridge

Blackline Safety G7 Bridge is a critical communication accessory designed to connect up to five G7 gas detection units to a satellite network, enabling reliable real-time data transmission in remote or challenging environments. This capability is especially valuable in locations where traditional cellular or Wi-Fi networks are unavailable.

[Buy](#) [Service](#)

Blackline Safety G7 Sample Probe

Blackline Safety G7 Sample Probe is a specialised accessory designed for use with the pumped version of the Blackline G7 gas detector. This probe enables the detection of gases in hard-to-reach areas, providing a convenient solution for sampling in confined spaces, elevated locations, or other challenging environments where direct access is difficult.

Blackline Safety G6 Calibration Tubing

The Blackline Safety G6 Calibration Tubing plays a critical role in ensuring the safe and accurate transfer of gas during calibration and bump testing procedures. This flexible tubing connects the gas bottle to the calibration cap, forming a secure pathway for test gas to flow into the Blackline Safety G6 device.

[Buy](#) [Service](#)

Blackline Safety G6 Wall Mount Bracket

Blackline Safety G6 Wall Mount Bracket is a practical and essential accessory designed specifically to securely mount the 25-bay charger for Blackline Safety G6 gas detection devices. This sturdy bracket provides an organized and efficient solution for charging multiple devices, keeping the workspace neat and clutter-free.

[Buy](#) [Service](#)

Blackline Safety G6 Calibration Cap

Blackline Safety G6 Calibration Cap is a crucial accessory designed to support the calibration and bump testing of the Blackline G6 gas detection device. Calibration and bump testing are essential practices in gas detection to ensure the accuracy and reliability of the device's sensors.

[Buy](#) [Service](#)

G7 Single Gas Calibration Cap

Blackline Safety G7 Single Gas Calibration Cap is a key accessory used to ensure the accurate calibration of G7 cartridges or individual sensors. Calibration is a crucial part of maintaining the performance and accuracy of gas detection devices.

[Buy](#) [Service](#)

G7 Multi-Gas Calibration Cap

Crowcon's enhanced Gasmaster gas detector control panel has a modular design meaning users only need purchase the required number of input modules. It can easily be extended by adding more modules at a later date.

G6 Charge Clip

Blackline Safety G6 Charge Clip is an indispensable accessory for maintaining the functionality of the Blackline Safety G6 gas detection device. Designed to deliver a secure and reliable connection between the G6 unit and a power source, this charge clip enables efficient recharging, ensuring the device remains operational.

[Buy](#) [Service](#)

G7 Micro-USB Multi-Charger

Blackline Safety G7 Micro-USB Multi-Charger (5-way) is an efficient solution for charging multiple Blackline G7 products simultaneously. Designed to streamline the charging process, this versatile charger allows you to connect and charge up to five G7 devices at once, ensuring that all your equipment is powered up.

[Buy](#) [Service](#)

Blackline Safety G6 Multi-Unit Charger

Blackline Safety G6 Multi-Unit Charger (25 bay) is an efficient charging solution designed to charge up to 25 G6 personal gas detection units simultaneously. This multi-unit charger is ideal for large teams and organizations that rely heavily on the G6 devices for continuous safety monitoring in industries such as construction, manufacturing.

[Buy](#) [Service](#)

Blackline Safety G7 Charge Clip

Blackline Safety G7 Charge Clip is a replacement accessory designed to provide reliable and secure charging for the G7 gas detection device. Over time, the original charge clip may experience wear and tear due to frequent use in industrial or rugged environments, making a replacement essential for ensuring continued performance.

[Buy](#) [Service](#)

“Robust, configurable, intelligent. Personal gas monitors ensure that your workers are notified of gas hazards in their environment in real time while integrated connectivity means you are notified the minute something happens—and can take corrective action to mitigate future hazards.”

Blackline Safety G7 Metal Belt Clip

Blackline Safety G7 Metal Belt Clip is a practical and durable accessory designed to securely attach your G7 device to your belt or waistband. This metal clip ensures that the gas detector remains easily accessible during work in hazardous environments, allowing workers to move freely while keeping the device within reach.

[Buy](#) [Service](#)

Blackline Safety G7 Dock Case

Blackline Safety G7 Dock Case is a durable and practical storage solution designed to securely hold the G7 Docking Station and a 34L gas bottle. This case is essential for businesses that rely on the G7 Docking Station for device maintenance, calibration, and bump testing in various field environments.

[Buy](#) [Service](#)

Blackline Safety G7 Dock

Blackline Safety G7 Dock is a multifunctional accessory designed to streamline the maintenance and operation of Blackline Safety G7 gas detection devices. This versatile dock enables users to efficiently bump test, calibrate, and charge the G7, ensuring that the device is always ready for use in hazardous environments.

[Buy](#) [Service](#)

Blackline Safety Location Beacon

The Blackline Safety Location Beacon is a powerful tool designed to enhance location transmission in environments where GPS signals are weak or obstructed. Whether indoors, underground, or in remote areas with poor satellite connectivity, the beacon ensures continuous, reliable location tracking for workers and assets.
