

ROCKALL  
SAFETY

# Safety Equipment Brochure

# WHY CHOOSE ROCKALL SAFETY?

Since 1995, Rockall Safety has been one of the UK's top suppliers of professional safety equipment to thousands of clients from a wide range of industries in the private and public sectors, including food & beverage, water & wastewater, petrochemicals, construction, as well as oil & gas.

We specialise in gas detection, monitoring, and measuring and offer a comprehensive product range which includes fixed and portable gas detectors, respiratory protection, and diagnostics equipment.

Our dedicated technical sales specialists are fully trained and certified to advise individual clients on the services and products they need to achieve the highest standards of safety.

With an established team of in-house engineers, trained and certified directly by manufacturers, our product range is calibrated, and tested to the highest standards prior to dispatch, which ensures that what you receive from us is immediately fit for field use upon arrival.

Rockall is an award-winning company which has successfully partnered with the world's leading gas safety manufacturers such as Honeywell, Dräger, and Crowcon to provide a wide range of products that cover various applications. We are even proud to be an Approved Service Point (ASP) for Dräger Master Service Centre and BW by Honeywell.

## Our main principles

We pride ourselves on providing excellent customer service, reliable gear, and technical support to our customers. Operating nationwide, our success as a business is based on our customer-oriented approach. We offer a prompt and efficient service, best prices, and most importantly the right safety solutions to meet your individual requirements.

## Our Services

Choosing Rockall ensures that you receive only the most reliable equipment available on the market, calibrated and tested by our certified engineers.

We also offer after-sales repair and maintenance checks on your safety devices, ensuring that these are up-to-date and function properly.

### Portable Gas

Portable gas detectors are compact devices used to detect hazardous gases in various environments. They ensure safety by providing real-time monitoring, alarming users of dangerous gas levels, and are essential for industrial, environmental, and emergency response applications.

### Fixed Gas

Fixed gas detectors are permanently installed devices used to continuously monitor and detect hazardous gases in specific areas. They enhance safety by providing constant surveillance, triggering alarms, and integrating with safety systems in industrial, commercial, and residential settings.

### Escape & Rescue

Escape and rescue involve strategies and procedures to safely evacuate individuals from hazardous situations and provide aid. These critical operations require proper planning, training, and equipment to ensure timely, efficient, and safe removal of individuals from danger zones.

### Confined Space

Confined spaces are areas with limited entry and exit points not designed for continuous occupancy. These spaces, like tanks, tunnels, and manholes, pose significant hazards, including poor ventilation, making safety measures essential for workers entering such environments.

### Servicing & Hire

Rockall Safety ensures your gas detector is serviced to the highest standards. Our expert team provides thorough maintenance, calibration, and repair, guaranteeing reliable performance and compliance with safety regulations, keeping your equipment ready for any hazardous environment.

### Fall Arrest

Fall arrest systems are safety mechanisms designed to prevent or stop falls from heights. They include harnesses, lanyards, and anchor points, ensuring worker safety in construction, maintenance, and other high-risk industries by minimizing injury risks associated with falls.

# TRIPODS & ACCESSORIES

The perfect solution for those operating in confined spaces, or requiring a rescue-from-height scenario, tripods & fall arrest systems present a durable and versatile safety product that can be relied on when you need it most.

When selecting a tripod, several key features are crucial to ensure safety, functionality, and ease of use. Here are the most important aspects to consider:

## **Load Rating:**

The tripod must have a high load capacity to support the weight of the personnel, equipment, and any additional loads such as rescue gear. A typical load rating is around 500 to 1,000 lbs (225 to 450 kg).

## **Leg Stability:**

Adjustable legs with locking mechanisms ensure the tripod remains stable on uneven surfaces.

Non-slip feet or rubberised bases help prevent slippage.

# FALL ARREST & ACCESSORIES

Fall arrest equipment is critical for protecting workers from falls, particularly in industries where working at height is common. When selecting fall arrest equipment, the following key features should be considered to ensure maximum safety and effectiveness:

## **Harness:**

A full-body harness distributes the forces of a fall across the shoulders, thighs, and pelvis, reducing the risk of injury. It should be comfortable, with padding in key areas.

## **Shock-Absorbing Lanyards:**

These lanyards reduce the impact force experienced by the user during a fall by gradually decelerating the fall, typically using an energy-absorbing mechanism.

## **D-Rings:**

D-rings are attachment points for lifelines and lanyards. They should be made of durable materials like steel and positioned at the center back (dorsal D-ring), and sometimes on the chest or hips, depending on the harness design.

Globestock Safety design, manufacture and distribute best in class safety products within the confined space, work at height and load arrest market sectors. Two sizes available: Standard (21kg) or Compact (18kg). It may be used as an anchor by more than one person simultaneously, providing the MWL is not exceeded.

Globestock take immense pride in our many years of British manufacturing heritage and to this day we engineer products that we are proud to put our name to. An in-house Design & Development department, backed-up by our manufacturing operation in the same building, alongside our quality test and inspection area, all ensure we have control over every aspect of our own products.

RIDGEGEAR was founded in 1998. Since that time, they have established themselves as a leading innovator in the height safety manufacturing industry. All of the advanced products are developed and produced at their factory in Leek, Staffordshire where they are extensively tested to the highest specification.

### RGK42 Trauma Suspension Straps

Trauma straps help to prevent the effects of toxic shock if the user is left suspended. The leg straps of a harness can cause loss of circulation to the legs and feet in the event of a fall.

Standing on these straps will relieve the pressure to the groin and release the tension within the webbing.

[Buy](#) [Service](#)

### RGH1 Rear D Harness

This one point safety harness comes with a single rear attachment point.

This safety harness is to be used primarily with a fall arrest safety lanyard to provide basic fall protection.

Meaning it can be used in vertical fall protection and restraint situations.

[Buy](#) [Service](#)

### RGH2 Front & Rear D Harness

This two point safety harness has both a rear and chest mounted front attachment points.

The two attachment points extend this harness's working capability. Meaning it can be used in vertical fall protection and restraint situations

[Buy](#) [Service](#)

### RGH2 Comfort Front & Rear D Harness

This two point safety harness has both a rear and chest mounted front attachment point.

This version of the RGH2 comes fitted with a shoulder comfort pad. The two attachment points extend this harness's working capability.

[Buy](#) [Service](#)

### RGH2 Deluxe Front & Rear D Harness

This two point safety harness offers improved comfort with the additions of a shoulder pad and leg pads.

The chest and leg straps comprise of fast fit buckles for quick donning. The two attachment points extend this harness's working capability.

[Buy](#) [Service](#)

### RGH2 FAST FIT Front & Rear D Harness

The perfect safety harness for when rapid donning and removal is crucial. This two point safety harness comes fitted with fast fit buckles, for quick donning.

The front and rear attachment points make for conventional safety lanyard attachment, whether that be for fall arrest or work restraint.

[Buy](#) [Service](#)

### RGH2 Glow High Visibility Front & Rear Harness

This safety harness is perfect for work in low lit areas due to the inclusion of reflective yarn.

The user will benefit from unprecedented levels of visibility, creating a much safer working environment.

[Buy](#) [Service](#)

### RGH3 Unisex Front & Rear D Harness

This two point Y-shaped safety harness is a unisex design with both rear and front attachment points.

Suited for fall protection when used with a compatible safety lanyard to create a fall arrest system. It can also be used for restraint situations.

[Buy](#) [Service](#)

They stand in a unique position. Because they manufacture the webbing their on-site they control the complete manufacturing process, which means you can be sure of the best quality end product delivered to you every time.

They understand that their products save lives so testing is constant, and repeated again when the production process is complete.

### RGH4 Front, Rear & Side D Work Positioning Harness

The RGH4 combines the basic fall arrest safety harness with a comfortable work positioning belt in one unit.

Fitted with a rear D and two side D rings mounted to the belt.

[Buy](#) [Service](#)

### RGH5 Rescue Harness

This three point rescue harness has been designed for confined space access. Ensuring the highest levels of safety with our rescue harness meticulously designed for emergency professionals.

Our rescue harness offers unmatched security and comfort in critical situations.

[Buy](#) [Service](#)

### RGH5 Glow High Visibility Rescue Harness

This three point rescue harness has reflective yarn weaved into its main webbing. Offering enhanced visibility in low-light conditions, ensuring safety during night-time operations.

Ideal for confined space access, due to the reflective yarn. Our rescue harness offers unmatched security and comfort in critical situations.

[Buy](#) [Service](#)

### RGH5 Super Glow High Visibility & Luminous Rescue Harness

This three point rescue harness has both reflective and glow-in-the-dark yarn weaved into its main webbing. Offering enhanced visibility in low-light conditions, ensuring safety during night-time operations.

The rescue strap keeps the wearer in an upright position. Ideal for rescuing an unconscious casualty.

[Buy](#) [Service](#)

### RGH6 Deluxe Comfort Front, Rear & Side D Work Positioning Harness

The RGH6 is a deluxe version of the RGH4 it has a thicker waist belt and the addition of a shoulder pad for extra comfort.

The RGH6 is also complete with extra tool loops which provide additional tool connection.

[Buy](#) [Service](#)

### RGH7 Premium Multi-Use 5pt Harness

A 5-point multi-use harness with the added bonus of upright rescue from the rear D. It can also be used for mountaineering.

Comfortable and controlled hands-free work can be achieved by double clipping into the side D rings.

[Buy](#) [Service](#)

### RGH7 SIT Work Positioning Harness

The RGH7 sit is a comfortable seat harness, used for work positioning and sit suspension tasks.

It comes with two tool loops which allow safe and reachable stowage of tools.

It can be combined with the RGH7 TOP to make a full body fall arrest.

[Buy](#) [Service](#)

### RGH15 Work Positioning Comfort Harness

This work positioning safety harness is perfect for lengthy hands free tasks, due to its lumbar supporting work positioning belt. The belt makes up two of the four connection points of this harness, the other two being front and rear attachment points.

[Buy](#) [Service](#)

(Scroll Wheel To Zoom)  
**RGL1 Single Leg Webbing Lanyard & Shock Absorber**

This single leg lanyard is produced using our anti-bacterial protection webbing.

[Buy](#)

**RGL2 Kernmantle Rope Lanyard & Shock Absorber**

This single leg fall arrest safety lanyard is produced using 11mm kernmantle rope with machine stitched connection eyes at each end.

[Buy](#)

**RGL3 Twin Leg Webbing Lanyard & Shock Absorber**

This twin leg fall arrest safety lanyard is produced using our anti-bacterial protection webbing.

[Buy](#)

**RGL6 Single Leg Elasticated Webbing Lanyard & Shock Absorber**

This single leg fall arrest safety lanyard comes with an elasticated leg. This decreases the hanging slack, which can help to reduce trip hazards and entanglement.

[Buy](#)

**RGL7 Shock Absorber**

The RGL7 is a standalone shock absorber pack. It is commonly seen being used on our lanyards, but can also be used on its own without adding an additional lanyard.

[Buy](#)

**RGL8 Twin Leg Rope Lanyard & Shock Absorber**

This twin leg fall arrest safety lanyard is produced using 11mm kernmantle rope with machine stitched connection eyes at each end.

[Buy](#)

**RGL9 Twin Leg Elasticated Webbing Lanyard & Shock Absorber**

This twin leg lanyard comes with elasticated legs. This decreases the hanging slack, which can help to reduce trip hazards and entanglement.

[Buy](#)

**RGL11 Kernmantle Rope Lanyard & Shock Absorber**

This single leg fall arrest safety lanyard is manufactured from kernmantle rope (which shows resistance to alkalis, oils and organic solvents)

[Buy](#)

### RGL13 Single Leg Adjustable Webbing Lanyard & Shock Absorber

This single leg fall arrest safety lanyard is to be used by an operative who is working from a static position when connected to a fixed anchor point. It also comes with an adjustable function to choose the length needed to avoid trip hazards.

[Buy](#)

### RGL16 Twin Leg Adjustable Webbing Lanyard & Shock Absorber

This twin leg fall arrest safety lanyard comes with an adjustable function to choose the length needed to avoid trip hazards. The operative can use this lanyard to move between anchor points through means of double clipping.

[Buy](#)

### RGL20 Single Leg Kinetic® Webbing Lanyard

The RGL20 is a fall arrest lanyard without the bulky shock pack, which incorporates inner webbing that (in the event of a fall) will stretch under a constant controlled force to reduce the impact on the wearer.

[Buy](#)

### RGL28 Chaser Twin Leg Self Retractable Lanyard

A self retractable lanyard for use when an operative works in an area with risk of a fall. The user can move between anchor points through means of double clipping, due to this lanyard being twin leg.

[Buy](#)

### RGL29 Twin Leg Webbing Tie Back Lanyard & Shock Absorber

The tie back safety lanyard was designed to loop around thick structures where a karabiner/scaffold hook won't fit.

[Buy](#)

### RGL30 Single Leg Webbing Tie Back Lanyard & Shock Absorber

The tie back safety lanyard was designed to loop around thick structures where a karabiner/scaffold hook won't fit.

[Buy](#)

### RGL60 CLiC-iT Twin Leg Shock Absorbing Lanyard

The CLiC-iT RGL60 is a revolutionary lanyard with interacting connectors and provides the user with continuous protection as one cannot be opened without the other being closed.

[Buy](#)

**RGA4H/EDGE Fall Arrest Block with recovery winch**

A three way retrieval block with the expected fall arrest capabilities, but with the added extra of an up/down winch mechanism and steadying handle.

[Buy](#) [Service](#)

**RGA4/EDGE Fall Arrest Block with recovery winch – 15m**

A three way retrieval block with the expected fall arrest capabilities, but with the added extra of an up/down winch mechanism.

[Buy](#) [Service](#)

**RGA2/EDGE Fall Arrest Block – 10m**

A popular multipurpose fall arrest block, which provides semi permanent protection whilst allowing uninhibited movement during working activities.

[Buy](#) [Service](#)

**RGA3/EDGE Fall Arrest Block – 15m**

The RGA3/EDGE is a robust fall arrest block with a long working length and heavier construction.

[Buy](#) [Service](#)

**RGA1 Fall Arrest Block – 2.5m (Webbing)**

The perfect personal issue fall arrest block for operatives working at height at a length of 2.5m.

[Buy](#) [Service](#)

**RGA26 Fall Arrest Block – 6m**

The RGA26 is a multipurpose fall arrest block, with a working length of 6m. It allows uninhibited movement during normal working activity and features a carrying handle that is part of the cast alloy housing.

[Buy](#) [Service](#)

**RGA2 Fall Arrest Block – 10m**

A popular multipurpose fall arrest block, which provides semi permanent protection whilst allowing uninhibited movement during working activities.

[Buy](#) [Service](#)

**RGA4 Fall Arrest Block with recovery winch – 15m**

A three way retrieval block with the expected fall arrest capabilities, but with the added extra of an up/down winch mechanism. The recovery feature means operatives who have experienced a fall can be winched up or down to safety.

[Buy](#) [Service](#)

### RGA4H Fall Arrest Block with recovery winch and steadying handle – 15m

A three way retrieval block with the expected fall arrest capabilities, but with the added extra of an up/down winch mechanism. This block also comes with a steadying handle for added stability when winching a casualty to safety.

[Buy](#) [Service](#)

### RGA3.3 WEB DEF Defender Fall Arrest Block – 3.3m (Webbing)

This 3.3m Defender fall arrest block has a webbing line which means it is exceptionally lightweight. It also comes with a aluminium swivel hook which has a fall indicator which allows user's to know when the item has been part of a fall.

[Buy](#) [Service](#)

### RGA3.3 DEF Defender Fall Arrest Block – 3.3m

This 3.3m Defender fall arrest block comes with a galvanised wire which makes operation smooth and unproblematic. The fall indicator is built into the aluminium swivel hook. It can be used for most working at height situations.

[Buy](#) [Service](#)

### RGA6 DEF Defender Fall Arrest Block – 6m

Designed to intercept any fall, this 6m variant of the Defender fall arrest block range provides the perfect solution for most working at height situations.

[Buy](#) [Service](#)

### RGA9 DEF Defender Fall Arrest Block – 9m

A 9m fall arrest block from the Defender range which ensure smooth and easy operations. Manufactured with galvanised wire to arrest all fall situations, along with a aluminium swivel hook with built in fall indicator.

[Buy](#) [Service](#)

### RGA20 DEF Defender Fall Arrest Block – 20m

The largest fall arrest block from the Defender range, produced with a 20m galvanised wire. Its substantial length means it is perfectly suited for most working at height situations.

[Buy](#) [Service](#)

**RGK1 17mm Steel Screwgate Karabiner**

Our most popular karabiner from the range. An opening of 17mm and manufactured from steel.

Double action with a screwgate opening which must be closed manually.

[Buy](#)

**RGK1/A 19mm Screwgate Aluminium Karabiner**

The RGK1/A is a lightweight alternative to the RGK1. The screwgate closure on this device means that the user must manually lock the RGK1/A keeper after fitting.

[Buy](#)

**RGK1/AT 19mm Triple Action Aluminium Karabiner**

The RGK1/AT is a triple action alternative to the RGK1/A.

[Buy](#)

**RGK2 17mm Steel Twistlock Karabiner**

This karabiner is extremely safe due to it having an automatic locking system.

Produced from steel with a 17mm opening. The twistlock design is double action.

[Buy](#)

**RGK3 24mm Steel Twistlock Karabiner**

A robust and strong karabiner to abide by ANSI standards. Usually used to clip to fall arrest safety lanyards and horizontal temporary anchor lines due to a larger opening of 24mm.

[Buy](#)

**RGK4 22mm Aluminium Twistlock Karabiner**

Produced from aluminium, so this karabiner is extremely lightweight. The double action gate opening is 22mm and twistlock which closes automatically.

[Buy](#)

**RGK5 56mm Steel Twistlock Scaffold Karabiner with Captive Pin**

This scaffold karabiner has a large gate opening of 56mm meaning it is ideal for use in industrial areas and can clip directly onto scaffolding/steel working.

[Buy](#)

**RGK6 54mm Aluminium Twistlock Scaffold Karabiner with Captive Pin**

A lightweight scaffold karabiner with a 54mm gate opening giving the option to clip to scaffolding/steel structures.

[Buy](#)

**RGK7 26mm Aluminium Screwgate HMS/Belay Karabiner**

The HMS or belay karabiner has a wide load bearing design allowing for smooth running of your rope.

The design also allows the hitch to invert. The karabiner has a screwgate closure.

[Buy](#)

**RGK10 19mm Steel Double Action Snap Hook**

This snap hook is usually used as an alternative to a twistlock connector. It has a 19mm double action self closing gate which can be clipping directly onto a safety harness' D ring.

[Buy](#)

**RGK11 60mm Aluminium Double Action Scaffold Hook**

A double action scaffold hook produced from aluminium which is usually used in conjunction with a fall arrest safety lanyard for quick clipping onto scaffold or steel structures.

[Buy](#)

**RGK11/SL 55mm Super Light Double Action Aluminium Scaffold Hook**

A lightweight alternative to our double action scaffold hook, at almost half its weight. This is the perfect scaffold hook when weight is of high importance.

[Buy](#)

**RGK11/LSH 110mm Aluminium Double-Action Scaffold Hook**

The RGK11/LSH is our largest scaffold hook, with a greater gate opening.

This scaffold hook is the only solution when an anchor point, such as a telecoms pole, wind turbine.

[Buy](#)

**RGK12 10mm Steel Screwgate Delta Link**

This connector offers a semi-permanent connection fall arrest equipment.

After fitting the delta link the user must manually lock it.

[Buy](#)

**RGK15 12mm Steel Triple Action Karabiner with Captive Pin**

An ANSI approved karabiner which means exceptional strength and extra peace of mind.

This karabiner is even safer due to it being triple action.

[Buy](#)

**RGK18 18mm Steel Triple Action Karabiner**

This karabiner benefits from a forged profile with a large gate opening and captive eye.

It is ANSI approved meaning it is exceptionally strong.

[Buy](#)

**RGK19 23mm Steel Triple Action Karabiner**

Similar to the RGK18, this strong and extra safe karabiner also benefits from a forged profile with captive eye and slightly wider gate opening.

It can be fitted to most lanyard types where additional safety is preferred.

[Buy](#)

**RGK20 10mm Screw-gate Delta Link**

The RGK20 is normally used as a central connection link at the attachment point of the front of an adventure/climbing harness.

[Buy](#)

**RGK44 22mm Aluminium Triple Action Karabiner**

It benefits from the additional safety benefits of a triple closure and also the lightweight make up of aluminium. The captive eye ensures permanent connection to a safety lanyard or fall arrest block.

[Buy](#)

**RGK45 21mm Steel Double Action Swivel Snap Hook**

This snap hook is double action and locks automatically.

The swivel function eliminates any twists when using a work positioning or self retracting safety lanyard, also the captive eye gives permanent connection.

[Buy](#)

**RGK50 18mm Step Bolt Connector**

The flat profile of this connector make it the most suitable for use when clipping to step bolts.

The fact this connector is also ANSI approved reflects its superior strength.

[Buy](#)

**RGK88 62mm Aluminium Double Action Scaffold Hook**

This scaffold hook is ANSI approved and has a large gate opening, perfect for connection to scaffold and steel structures.

The double action snap closure ensures that there is no chance of accidental opening.

[Buy](#)

# TRAINING COURSES

We understand the dangers of working at height and the importance of correct and in-depth height safety training when working in this type of environment.

We know it is paramount to not only ensure the worker's safety, but also the people around them. To make sure workers at height have the best possible preparation, we offer an array of training courses designed to equip any delegate with the right knowledge and practical skills to work safely and effectively within their given area.

**Courses include:**

- Safety Harness Training
- Work at Height Awareness
- MEWP Harness Use & Inspection
- Safe Use of Fixed Wire Systems
- Working at Height – Practical
- Working at Height – Fall Arrest
- Work Restraint
- Fixed Ladder Access
- PPE Inspector
- Rooftop Operative
- Managing Work at Height
- Rescue & Evacuation at Height
- Suspended Operative Rescue
- High Level Self Evacuation
