SAFETY

Portable Gas Detection

Why Choose Rockall Safety?

Our dedicated technical sales specialists are fully trained and certified, providing customers with reliable gas detection equipment.

Since 1995, Rockall Safety have been supporting clients who require the highest safety standards, providing them with the best technology and dedicated team for each solution.

Our highly experienced engineers offer effective, bespoke solutions for each gas detection requirement.

Our wide range of clients include small companies, medium enterprises, and large industrial entities and national organisations.

With a wide spectrum of industries that utilise our products and services, our key responsibilities as a dedicated company, are to provide an excellent customer experience as well as reliable technology that you and your colleagues can depend on.

Operating throughout the UK, our success as a growing business is based on our customer-orientated philosophy; customers expect a prompt, professional and efficient service, value, and above all the right products to help them carry out their work as safely as possible.

We'd love to hear from you, so call our team today on 02920 759 683

Portable Gas Detection

What are the advantages of using a Portable Gas Detector?

Real-Time Monitoring:

Detect hazardous gas levels in real-time and provide instant warnings.

Ease of Use:

Clear displays, simple controls, and intuitive calibration procedures.

Detects a Wide Range of Gases:

Can detect various gases, including toxic, flammable, oxygen depletion, VOCs and specific industry-relevant gases, depending on the sensors installed.

Call today for a free, no obligation consultation.

Buying Process

Buying from Rockall Safety - What will happen next?

Contact your Account Manager

Contact your account manager to discuss your specific requirements, including the type of gases you need to detect, the environment in which the device will be used, and any additional features you might require, such as data logging or multi-gas detection. Based on this information, the account manager will recommend a suitable product.

Receive a Quote

Once you are satisfied with the product recommended by your account manager, you will receive a quote. Review the quote carefully to ensure everything included meets your expectations. If you are happy with it, inform your account manager to proceed.

Your Product will be Shipped

Your product will be shipped according to the agreed lead time, and you will receive the portable gas detector(s), any applicable accessories such as charging cables or calibration kits, and all relevant documentation, including user manuals and a warranty card.

Bump Test, Calibration, Service.

Bump Test

We recommend performing a bump test before each use to check the sensor is performing as it should.

Calibration

We recommend you always check the manufacturer's recommendations, as some devices may have specific calibration requirements.

Service

We recommend that all portable gas detectors are send back to Rockall Safety for yearly servicing.

Rockall Safety provide a full servicing package that includes calibration, sensor checks, and any necessary repairs. This ensures your device remains compliant with industry standards and prolongs its lifespan.

Industries We Work With

Food & Beverage

At Rockall, we understand the risks workers face within the Food and Beverage Industry. Regular exposure to gases such as Carbon Dioxide, Nitrogen and Ammonia, which are commonly produced and utilised, can be a serious health hazard. Our gas detection products and services are specifically designed to safeguard workers, prevent accidents, and ensure the highest level of compliance.

Water & Wastewater

We deeply understand the dangers workers in this field can face daily. Without the correct (fully serviced) equipment, each working operation poses a serious, almost guaranteed risk to life. So without compromise, we will always strive to provide the highest levels of safety and compliance.

Petrochemicals

From medication to plastics, petrochemicals are a common low-cost solution for manufacturing that present a unique set of safety challenges. Rockall Safety have gained decades of technical experience working in partnership with some of the UK's largest industrial companies, providing an essential role in the provision of critical equipment and servicing, to help ensure worker safety and maintenance of the highest safety standards.

Construction

We offer an extensive selection of products designed to protect workers throughout the construction industry. From safety harnesses to portable gas monitors, we have an extensive range of products that can help ensure a high standard of protection for your workers whilst operating in a hazardous environment.

Oil & Gas

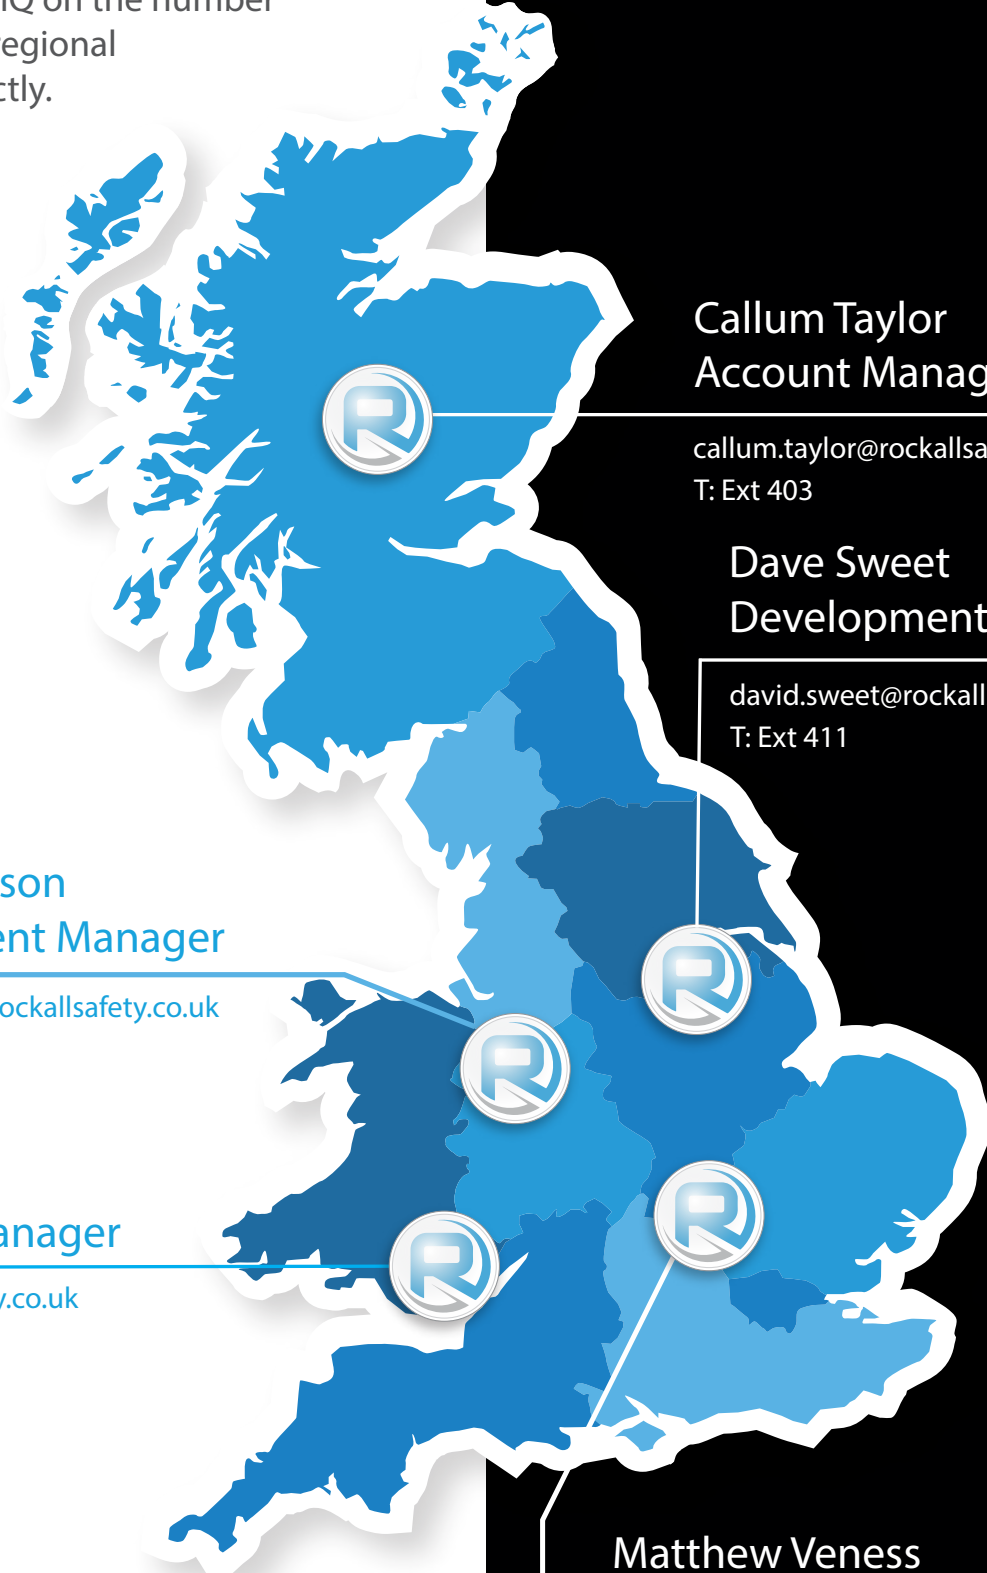

Rockall Safety provide a wide range of fixed and portable gas detection solutions, sourced from the world's leading manufacturers, designed to withstand the toughest industrial environments and provide real-time situational awareness. We also provide confined-space solutions, including tripods, winches, fall arrest, harnesses, self-rescue, breathing equipment, and rescue stretchers.
